DESIGN THINKING

Dorota Gębaczyk

‘You cannot hold a design in your hand. It is not a thing. It is a process. A system. A way of thinking.’

Bob Gill, *Graphic Design as a Second Language*

Ideation. Design Infusion. Design Thinking.

Design Thinking

Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success

—Tim Brown, Executive Chair of IDEO

<https://www.ideo.com/>

Design Thinking

- is a process for creative problem solving.
- has a human-centered core. It encourages organizations to focus on the people they're creating for, which leads to better products, services, and internal processes.

When you sit down to create a solution for a business need, the first question should always be what's the human need behind it?

- <https://www.ideou.com/blogs/inspiration/what-is-design-thinking>

DESIGN THINKING - ASSUMPTIONS

- User focus– understanding his/her conscious and unconscious needs.
- Interdisciplinary team– looking at the problem from many perspectives (co-creation).
- Experimentation and frequent hypothesis testing (iterative)– building prototypes and collecting feedback from users.

Areas Where Design Thinking Can be Applied

- product, service and experience design
- business design
- leadership
- organizational change
- visual communication and symbolism (graphic design),
- objects and products (industrial design),
- activities and services (service design),
- complex systems or environments related to work, living space, fun and learning (interaction design)
- [R. Buchanan, Wicked Problems in Design Thinking. Design Issues, 1992, 8, 5-21]

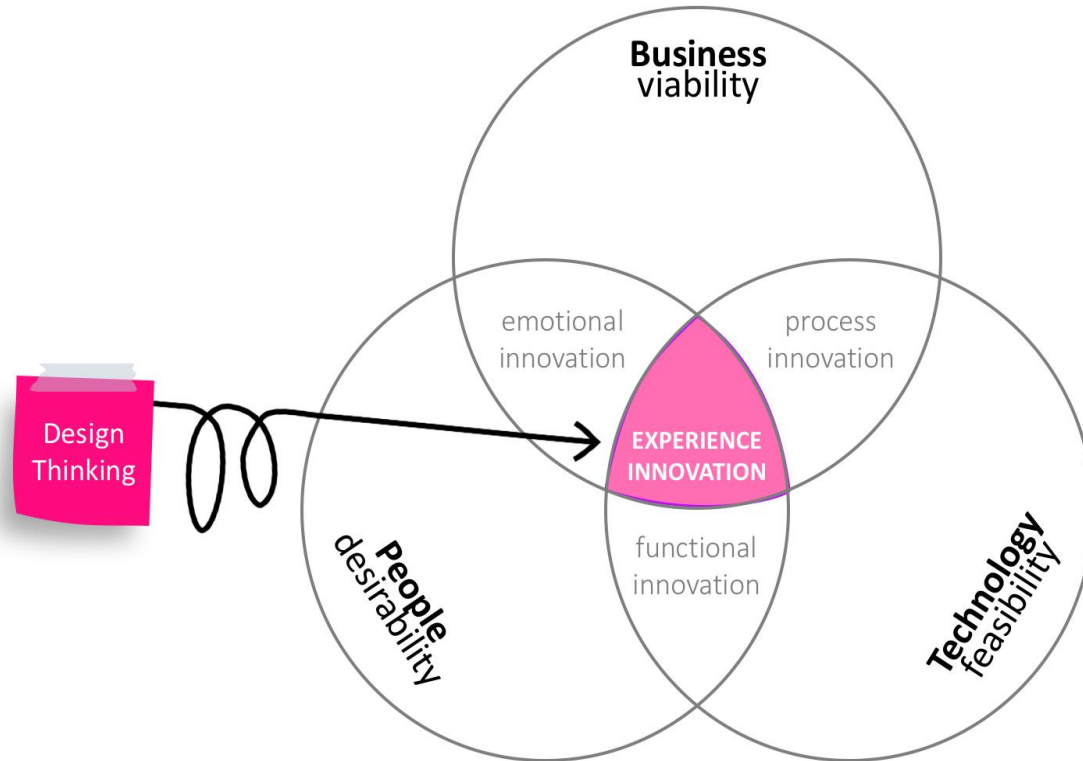

Design Thinking -for whom?

- The methodology is used regardless of the size of the company or industry, but with the predominance of the sector for-profit. [study by Hasso-Plattner Institute, University of Potsdam]

Implemented in the largest, most innovative companies, such as:

- SAP
- Samsung
- General Electric
- Apple
- Google
- Intel

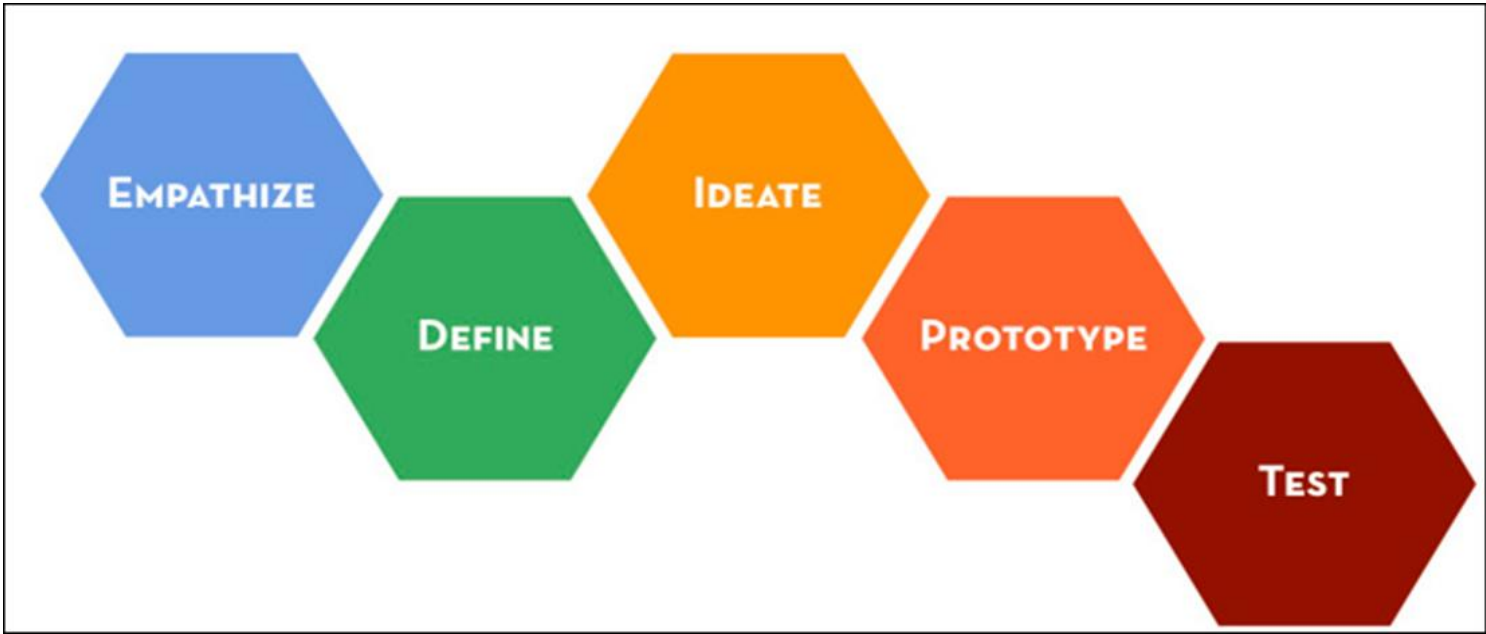

3 key perspectives of design innovation

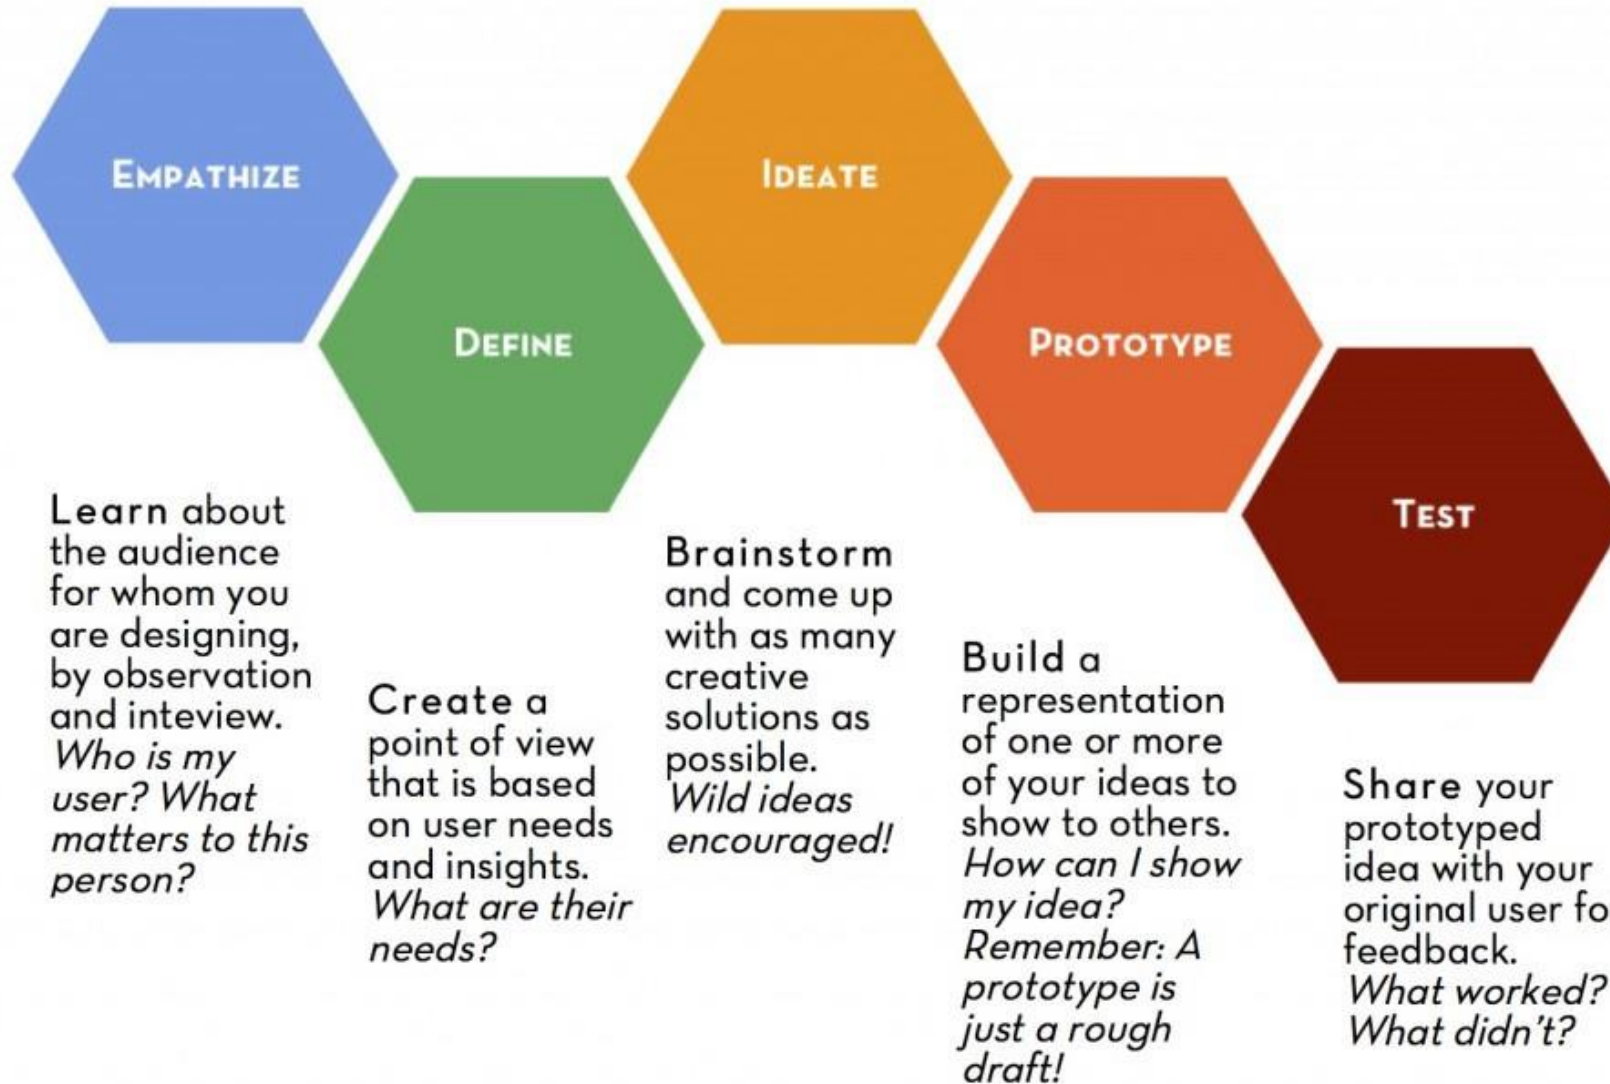

3 Essential Pillars of Design Thinking

- Empathy — Understanding the needs of those you're designing for.
- Ideation — Generating a lot of ideas. Brainstorming is one technique, but there are many others.
- Experimentation — Testing those ideas with prototyping.

The Design Thinking process as defined by Stanford's d-school

We are all DESIGNERS!
